GAME PITCH DOCUMENT

Survival horror visual novel | Ren’Py

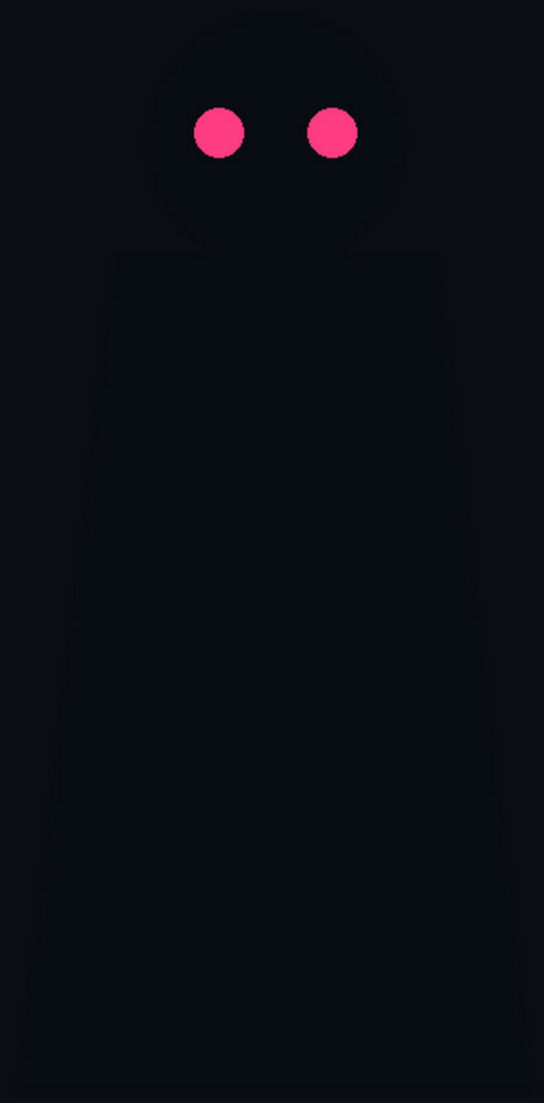

STATIC HARBOR

SIX HOURS. ONE CONTROL ROOM.

EAST HALL NIGHT 1

Premise

You are the new night operator at Pier 9 Tidal Control. The harbor was evacuated years ago, but the station was never switched off.

Something noticed. Each night from 12AM to 6AM, the Tidewalkers rise with the tide and follow the water and the light toward your office.

Six hours. One control room.

Core Loop

WATCH

Cycle the cameras and track enemy positions.

RATION

Power is limited. Cameras, lights and gates all draw from it.

DEFEND

Close floodgates, use the shock-lamp, answer sonar pings.

SURVIVE

Reach 6AM and unlock the next night.

One in-game hour lasts 90 real seconds, so a full night takes about nine minutes: short enough to retry, long enough to build dread.

Systems

Clock

A visible 12AM to 6AM clock drives pacing and timed events.

Power

A shared meter. Everything you do to stay safe drains it.

Cameras

Pseudo-3D rooms with depth-map lighting and CRT distortion.

Floodgates

Block Brine and Undertow, but each closure costs power.

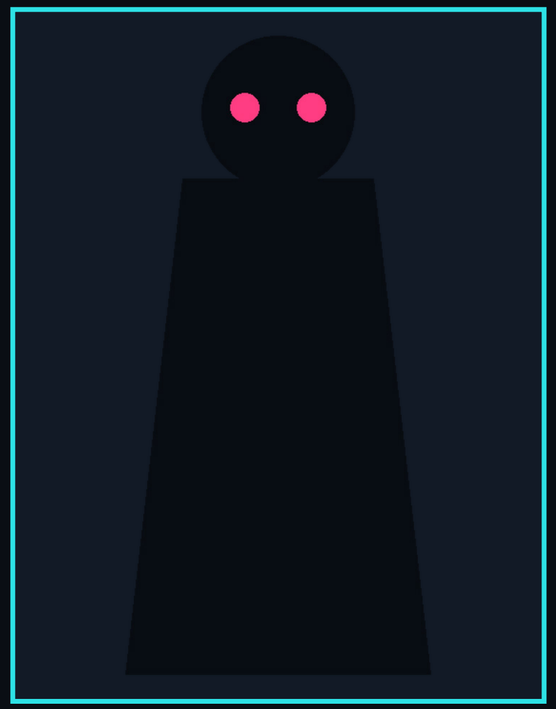

Sonar

Pings reveal enemy positions for a short window.

Shock-lamp

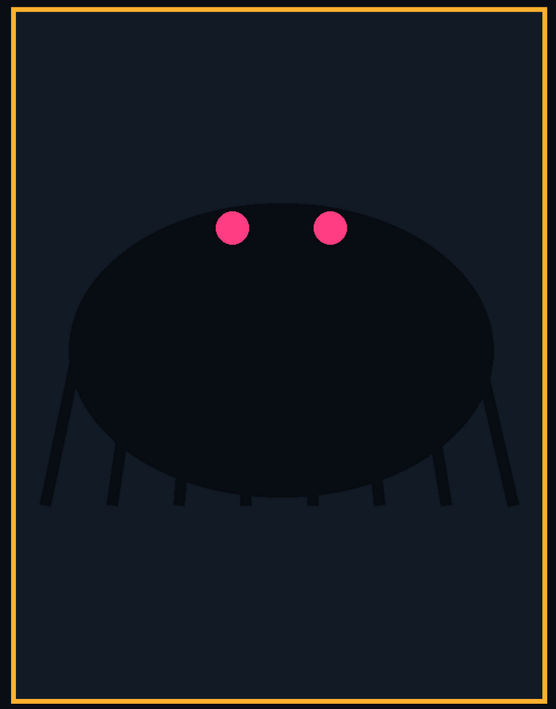

Three charges per night. Makes a Tidewalker lose signal and retreat.

The Tidewalkers

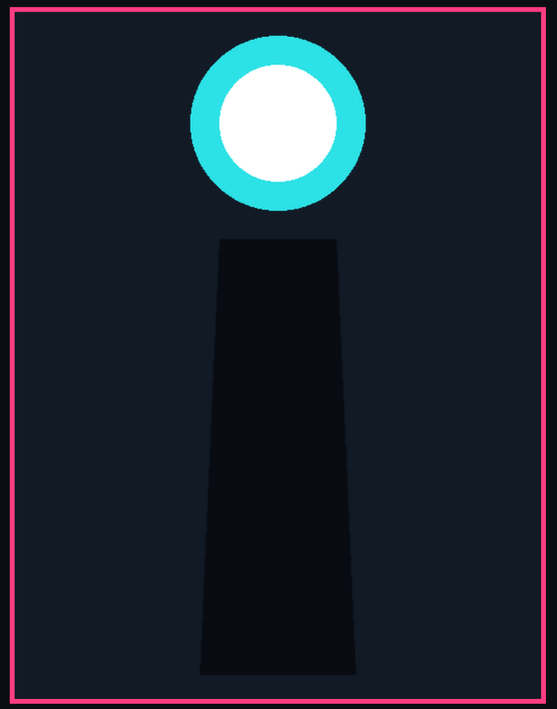

THE DRIFTER

Slow and steady. Retreats from light.

BRINE

Fast. Moves through pipes and vents.

THE LAMPLIGHTER

Only moves while you look away.

UNDERTOW

Floods rooms in sequence from Night 3.

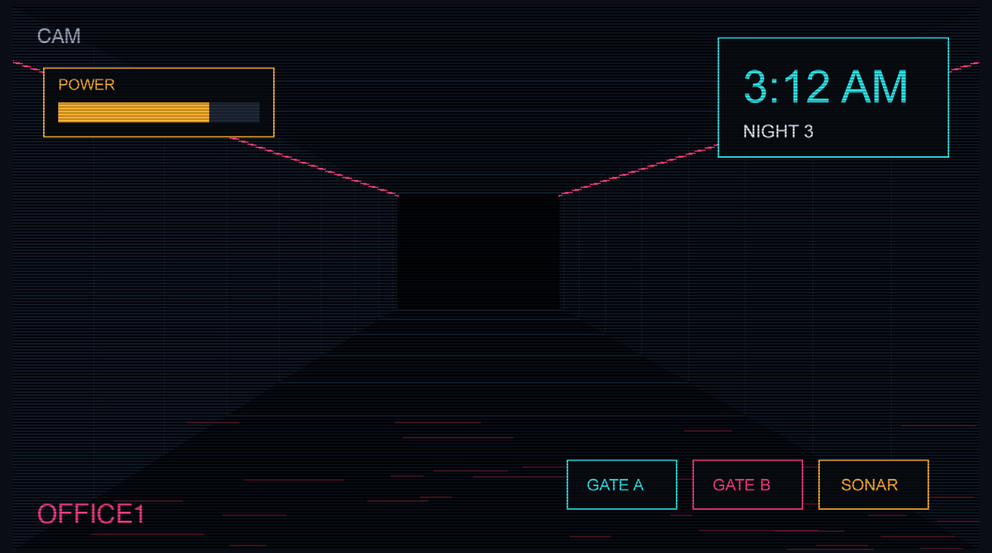

Progression

Night	New mechanic	Enemies
1	Cameras, door light	Drifter
2	Power meter, sonar	+ Brine
3	Floodgates	+ Lamplighter
4	Storm: power flickers	+ Undertow
5	All systems, no tutorial	All four
Endless	Aggression scales hourly	All

Art & Audio Direction

Deep Navy | Cyan | Hot Pink | Amber | Bone

Pseudo-3D scenes: flat 2D art lit with depth maps so shadows and highlights respond to the player. A CRT camera look adds scanlines, barrel bend and RGB split.

Audio pillars: a constant tide hum, cues that warn before danger, silence as a threat, and a bell at 6AM as relief.

Audience & Scope

Audience	Fans of tense, replayable indie horror and story-driven games.
Platform	PC and Mac, built in Ren’Py with Python and custom shaders.
Scope	Five nights plus endless mode, four Tidewalker types.
Team	Solo developer.
